

Congress on

SAFETY

in Engineering and Industry 2021

Leading Safety into the Future

REGISTER NOW

NOVEMBER 1–3, 2021

**Sheraton Fort Worth
Downtown Hotel
Fort Worth, Texas, USA**

www.safetycongress.org
#SafetyCongress2021

Convene with leaders across industries and the breadth of science and engineering disciplines to address shared safety challenges.

Learn best practices used by different industries and organizations for solving similar safety problems.

- Operational, Process, and Project Safety
- Safety Leadership and Culture
- Safety Management
- System Design and Implementation
- Effective Use of Data Metrics

“One of the greatest potential contributions for Safety Congress 2021 is to allow different industries and organizations to learn from each other, foster new networks, and address more effective ways to integrate safety considerations at the university level.”

— Roland Moreau, Chair, Congress on Safety in Engineering & Industry 2021 Program Committee

KEYNOTE:

- The Importance of Safety and the Value of Networking across Sectors

PLENARY SESSIONS:

- The Value Proposition for Safety
- Executing an Effective Risk Management Program
- The Role of Technology and Innovation in Improving Safety Performance
- Planning and Preparedness for Safety and Health Emergencies
- Leading the Future of Safety by Learning from the Past

Safety Congress 2021 is made possible with generous support from the McElhattan Foundation, National Academies, and United Engineering Foundation.
